## Executive Summary

The October 2022 issue of the report on the Fiscal-Macro position contains relevant data and analysis on the movement of major macroeconomic variables during the period July-October 2023 compared to the same period of the previous year. An overview of the report is given below:

### **Fiscal Sector**

An increase in tax and non-tax revenue by 6.01 percent and 41.37 percent respectively resulted in a total revenue collection increase of 6.74 percent in the first four months of FY23 compared to the previous fiscal year. For the same period, total government spending decreases by 1.47 percent. The Overall budget balance (surplus) including grants was 0.07 percent of the targeted GDP at the end of the fourth month of FY23<sup>1</sup>.

### **Monetary Sector**

Broad Money (M2) increased by 8.30 percent at the end of October 2023 which resulted from 15.03 percent growth in the Net Domestic Asset (NDA) and -13.46 percent growth in the Net Foreign Asset (NFA). At the same time, reserve money grew only by 5.18 percent resulting in a rise in the money multiplier by 0.6 on a year-on-year basis.

### **External Sector**

Export registered an encouraging growth of 13.88 percent during the period July-October 2023 compared to the export of the same period of the previous year. For the same period, import payments increased by 6.69 percent. Remittance inflow also increased by 2.04 percent. At the end of the period July-October 2023, foreign exchange reserve stood at US\$ 35.8 billion, which was approximately equivalent to the import payments of 4.39 months.

### **Real Sector**

Compared to October FY22, in October FY23, the quantum Index of the large and medium-scale manufacturing industry decreased by 2.03 percent. During this period, wearing apparel products experienced -2.21 percent growth followed by Leather & related products with 26.09 percent growth. Inflation (point to point) decreased to 8.91 percent in October FY23 from 9.1 percent in September FY23. Food inflation decreased from 9.08 percent in September 2022 to 8.5 percent in October 2022. However, non-food inflation rose from 9.13 percent in September 2022 to 9.58 percent in October 2022.

---

<sup>1</sup> Note: Fiscal sector data collected from iBAS on 30 January 2023

## 1. FISCAL SECTOR

### 1.1 Revenue Earnings

Revenue collection in July-October FY23 demonstrated moderate growth as Tax revenue increased by 6.7 percent and non-tax revenue decreased by 1.33 percent compared to the same period of FY22. The overall increase in revenue is 5.79 percent during July-October FY23 compared to same period of FY22 (Table 1.1).

### 1.2 Government Expenditure

Total operating expenses increased by 1.75 percent to Tk. 79753.31 crore in October FY23 compared to Tk. 78380.11 crore in October FY22. However, the ADP implementation in October FY23 decreased by 7.99 percent compared to that of October FY22. The case of overall development expenditure is almost

same as ADP expenditure. Overall government expenditure decreased by 1.47 percent in October FY23 compared to that of October FY22. According to the Implementation, Monitoring and Evaluation Division (IMED) of the Ministry of Planning, the execution rate of ADP is 51 percent.

**Table 1.2: Government Expenditure (Crore taka)**

### 1.3 Budget Deficit

Moderate growth in revenue collection coupled with a fell in overall expenditure in October FY23, resulted in the overall budget balance (including grants) of Tk 3138.44 crore which is 0.07 percent of the projected GDP for FY23. For the same period of the previous Fiscal Year, the overall budget deficit had been taka 1381.44 crore which was 0.03 percent of GDP of that year.

**Table 1.3: Budget Balance (Crore taka)**

Year	Overall Balance	Overall Balance as % of GDP	GDP
2022-23 (July-October)	3138.44	0.07	4,449,959.12
2021-22 (July-October)	-1381.83	-0.03	3,976,462.00

## 1.4 Deficit Financing

The government arranged its financing requirement from the banking system and the external sources in the two months of the fiscal year to repay the non-bank borrowing loans undertaken in the past. Therefore, the Government has financed its budget deficit predominantly from the bank and external sources on October FY23.

**Table 1.4: Deficit financing (Crore taka, Excluding Grants)**

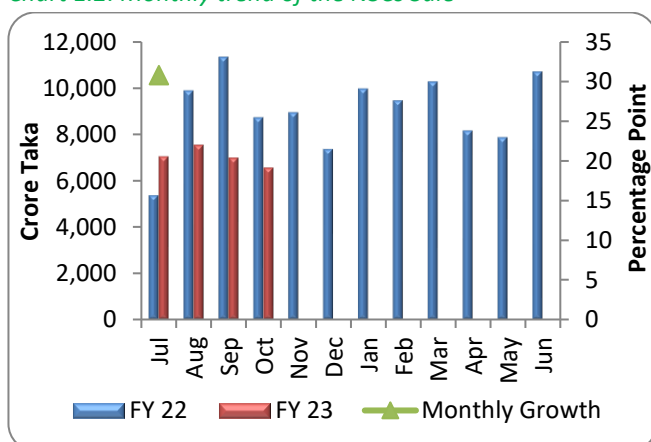

Period	External (Net)	Domestic			Total Financing	Financing as % of GDP
		Bank	Non-Bank	Total		
2022-23 (July-October)	1,841.36	7,199.57	-12,424.56	-5,224.99	-3,383.63	-0.08

### 1.4.1 National Savings Certificates (NSCs)

NSCs sales decreased by 20.62 percent in October FY23 compared to that of October FY22 due to undertaking some strict policy measures. The net sale of NSCs during July- October of FY23 decreased by 106.78 percent compared to the same period of the previous year. The outstanding stock of NSCs stands at taka 363,377.54 crore at the end of October FY23 which is 5.79 percent higher compared to that of October FY22.

**Chart 1.2: Monthly trend of the NSCs Sale**

## 2. MONETARY SECTOR

### 2.1 Monetary and Credit Development

Broad money (M2) increased by 8.30 percent at the end of October FY23 compared to that of October FY22. Of the sources of broad money, Net Domestic Asset (NDA) increased by 15.03 percent while Net Foreign Asset decreased by 13.46 percent. Despite strong public sector credit growth, government borrowing from the banking system contributed to the less than expected credit growth in the private sector. Again, a negative growth in NFA contributed to the slower growth of broad money in October FY23 compared to that of June FY22.

**Table 2.1: Monetary and Credit Development**

Items	Outstanding stock			% Changes in	
	at the end of the period			Outstanding stock	
	Oct-22	Oct-21	Jun-22	Oct-22 over Oct-21	Oct-22 over June-22
<b>A. Net Foreign Assets (NFA)</b>	3,261.34	3,768.65	3,642.99	-13.46	-10.48
<b>B. Net Domestic Asset (NDA)</b>	14,006.35	12,175.96	13,438.23	15.03	4.23
a. Domestic Credit	17,330.86	14,821.05	16,717.49	16.93	3.67

<b>C. Broad Money (A+B)</b>	17,267.69	15,944.60	17,081.22	8.30	1.09

Source: Monthly Economic Trends, Bangladesh Bank

### 2.2 Reserve Money Development

Reserve money increased by 5.18 percent at the end of October FY23 compared to that of October FY22. Money multiplier rose to 5.08 at the end of October 2022 from 4.92 at the end of June 2022, resulting from a decrease of reserve deposit ratio. However, the rise of currency deposit ratio had offset the rise of multiplier to some extent.

**Table 2.2: Reserve money and money multiplier (Billion BDT)**

Items	Outstanding Stock at the end of the period			Changes in Outstanding Stock	
	Oct-22	Oct-21	Jun-22	Oct-22 over Oct-21	Oct-22 over June-22
<b>Reserve money</b>	3,401	3,233	3,472	5.18%	-2.04%
<b>Money multiplier</b>	5.08	4.93	4.92	0.15	0.16

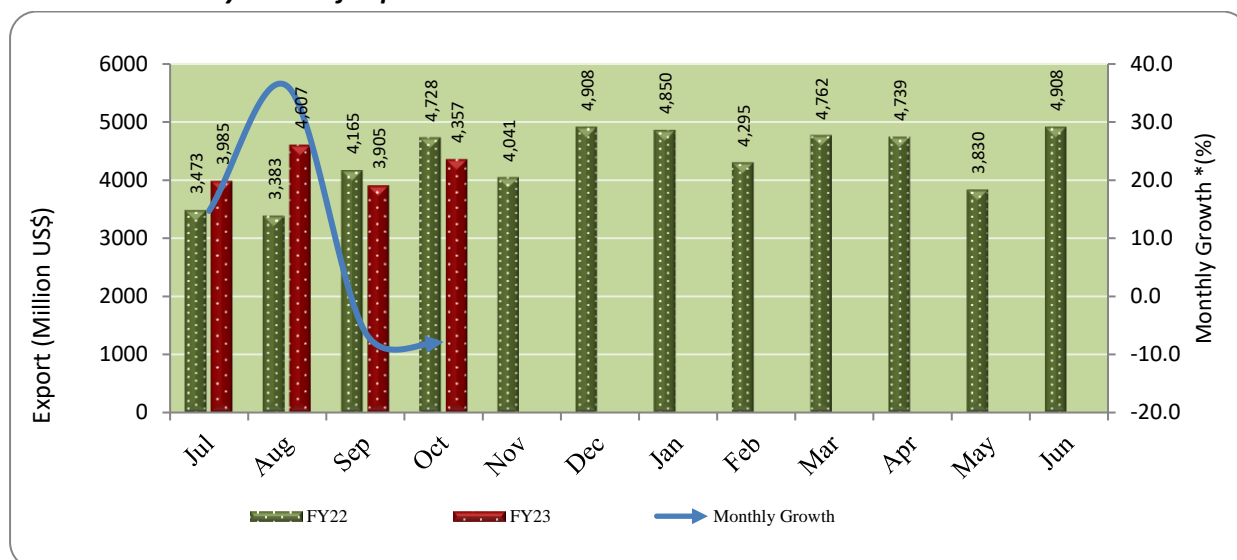

Source: Major Economic Indicators, Bangladesh Bank

### 3. EXTERNAL SECTOR

#### 3.1 Exports

In October FY22, total export continued to grow above the strategic target. Merchandise export increased by 13.38 percent on October FY23 compared to the export of October FY22. On a year-on-year basis, total commodity export grew by 13.38 percent during July- October FY23. This higher growth in export is due to strong rebound in demand for apparels in the major export destinations of Bangladesh, as the economies are recovering from the shock of the Covid-19 pandemic.

**Chart 3.1: Monthly Trend of Exports**

Source: Export Promotion Bureau, \*Growth over the same period of the previous year

**Table 3.1: Export Performance (Million US\$)**

	2022-23	2021-22	2021-22	2020-21
	(July-October)	(July-October)		
Export	16,853.50	15,749.48	52,082.66	38,758.31
Growth*(%)	13.38	-0.31	34.38	15.10

Source: Export Promotion Bureau, \*Growth over the same period of the previous year;

#### 3.2 Imports (C & F)

Imports increased by 6.69 percent on October FY23 compared to that of October FY22. Mentionable that most of the part of the last fiscal year, import increased significantly over the level of the previous year. Import surged due to rebound in commodity demand of apparel exports with recovering of economies from the shock of the covid-19 pandemic, which resulted in a rise in the opening of back-to-back Letter of Credits (LCs) of for importing of raw materials. Again, increased import of capital goods along with higher commodity prices in the global market is also responsible for the rise in import bills. The trend is also seen in the fact that LCs settlement by 31.59 percent in September FY23 compared to that of September FY22. However, due to various measures of the government to curtail import, Letter of Credit (LC) opening started to decreased and on a year-on year basis it was 8.57 percent lower in September FY23.

**Chart 3.2: Monthly Trend of Import Payments**

Source: Bangladesh Bank, \*Growth over the same period of the previous year;

**Table 3.2: Import Scenario (Million US\$)**

Period	2022-23	2021-22	2020-21	2019-20
	(July-September)	(July-September)		
Import payments (July-Oct)	27,560.00	25,830.90	89,162.00	65,594.70

Growth (%)	31.59	-	12.07	-10.879

Source: Bangladesh Bank, \*Growth over the same period of the previous year;

### 3.3 Remittances

Workers' remittances in October FY23 increased by 2.04 percent to USD 7198.99 million against USD 7054.75 million in October FY22. Various initiatives of the Government to incentivize remittance inflow such as 2.5 percent cash incentive, easing the rules on the furnishing of documents and depreciation of exchange rate (BDT/USD) might have worked on the overseas migrants to send remittances through legal channel. The rising number of labour migration in FY22 may also have a positive impact on inward remittances.

**Chart 3.3: Monthly Trend of Remittance**

Source: Bangladesh Bank, \*Growth over the same period of the previous year;

**Table 3.3: Remittance Performance (Million US\$)**

	2022-23	2021-22	2021-22	2020-21
	(July-October)	(July-October)

As % of Export	42.72	44.79	40.38	63.65
As % of GDP	18.42	18.09	4.57	5.93
Growth (%)	2.04	-19.30	35.51	10.87

Source: Bangladesh Bank;

### 3.4 Balance of Payments (BOP)

The trade deficit further widened in July-October of FY23 compared to the same period of the previous fiscal year as the import surged remarkably amidst recovering exports in recent months. Moreover, the falling remittances inflow along with the higher import payments worsened the current account deficit of US\$ -4501 million compared to a deficit of US\$ -3834 million for the same period of the previous year. As a result, overall deficit stood at US\$ 4.8 billion at the end of October FY23 compared to a 1.3 billion US\$ deficit in the same time of the previous year.

**Table 3.4: Balance of Payments (Million US\$)**

	2022-23 (July- Oct)	2021-22 (July- Oct)	2021-22	2020-21
Trade Balance	-9587	-9160	-22799	-17858

Error & Omission	-409	-364	-219	-172
Overall Balance	-4,872	-1,339	9274	3,169

Source: Bangladesh Bank;

### 3.5 External Reserve

Gross foreign exchange reserves stood at USD 35.8 billion in October FY23 which was sufficient to pay import liability of 4.39 months, considering the average of the previous 12 months' imports.

**Table 3.5: Foreign Exchange Reserve (End of the month)**

Reserve	2022-23	2021-22	2021-22
	(End of Sept)	(End of Sept)	(End of June)
Million US\$	35,808.73	46,459.27	41826.73
Months of import payment	4.39	7.74	5.77

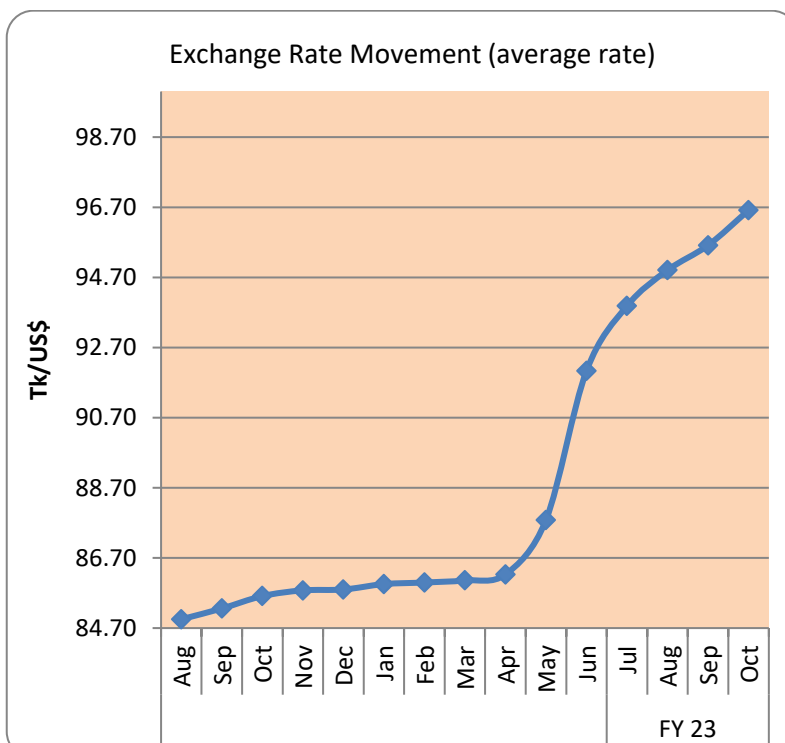

Source: Bangladesh Bank

### 3.6 Exchange Rate Movements

Starting from January 2022, Taka depreciated by 11.23 percent as compared to its level at the end of October 2022 and reached BDT 100.05 per USD. The depreciation of Taka can be attributed to the lower inflow of remittances and higher import payments that have created excess pressure on foreign exchange reserves. Bangladesh Bank acted upon the foreign exchange market with a large net sale of USD to stabilize Taka.

**Table 3.6: Exchange Rate Movement (Taka/US\$)**

Period	Average	End period

## 4.2 CPI Inflation

Point to point inflation decreased to 8.91 percent in October FY23 from 9.1 percent of September FY23 where food inflation decreased from 9.08 to 8.5 percent, but non-food inflation rose from 9.13 to 9.58 percent. On twelve-month average basis inflation rose to 7.23 percent in October FY23 from 6.96 percent in September FY23, which is 0.27 percentage point lower than the target of 7.50 percent for FY23. Steady rise in the point-to-point inflation since October 2021 was the key factor behind the growing trend of the twelve-month average inflation. Rising commodity prices in the international markets following the demand-supply mismatch powered by Russia-Ukraine war might be the main factors for the aggravating inflation situation since the start of economic reopening from the shock of COVID-19 pandemic.

**Table 4.3: CPI Inflation (National) (Base 2005-06)**

Fiscal Year	Twelve-Month Average Basis			Point to Point Basis		
	General	Food	Non-Food	General	Food	Non-Food
2018-19	5.48	5.51	5.42	5.52	5.40	5.71
2019-20	5.65	5.52	5.85	5.65	5.56	5.85
