- Up to October FY11, NBR revenue represents 77.1% of the total revenue. Only 20.3% of the revenue comes from income tax.

On annual and monthly basis, there are small differences between NSD source and CGA source for Non-Bank borrowing. But for bank borrowing, the difference between the two sources in case of both cumulative and monthly figure is very large in percentage.

Data generated under the Budgeting Information System still underreports development expenditure and it seems, there is some time lag between actual expenditure and inputting the same in the system. This seems to be true also for Revenue expenditure.
