These are:

- There exists a huge dependence on indirect taxes.
- Only 20.1% of the revenue comes from income tax.
- The share of import revenue in total revenue has experienced a declining trend.

On annual and monthly basis, there are small differences between NSD source and CGA source for Non-Bank borrowing. But data of bank borrowing from Bangladesh bank and CGA sources show a larger difference.

Data generated under the Budgeting Information System still underreports development expenditure and it seems, there is some time lag between actual expenditure and inputting the same in the System. This seems to be true also for Revenue expenditure.

The major problematic areas are:

- Regarding expenditures up to April FY10, 26 (twenty six) Ministries/Divisions show a utilization of revenue resources more than 80.0%.
- Development expenditure remains underreported and poorly utilized.
