- Biased towards external sector (about 40%) and susceptible to external shocks.

Data generated under the Budgeting Information System still underreports development expenditure and it seems there is some time lag between actual expenditure and inputting the same in the System.

- Regarding expenditures up to March FY08, 21 (twenty one) ministries/divisions show a utilization of revenue resources more than 65%.
- Overall development expenditure remains unreported. There is also a probability that development expenditure remains under-utilized up to the third quarter of the year resulting misutilization towards the end of the FY. This needs to be addressed.

f. Budget Financing

Table e.1 in the previous page presents the budget deficit position. The table presented below indicates sources of financing the deficit and their shares. Following Values of major policy variables emerge from the above-mentioned two tables:

- Public expenditure hovers around 15.1% of GDP.
- Budget deficit in FY07, measured from above the line, as % of GDP is about 4.6%.
- Net foreign financing of budget deficit is around 0.7% of GDP.
- Domestic borrowing stands at 3.9% of GDP, of which, bank borrowing has a larger share and it is 3.5%.
